Phat Tran

Senior Quality Assurance Engineer

Binh Thanh, Ho Chi Minh City | trantanphat190999@gmail.com | 0971817167

LinkedIn | GitHub / Portfolio

Quality Assurance Engineer focused on API test automation, performance testing, and CI/CD workflows. Experience with enterprise software testing and AI-assisted QA workflows.

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer | Aug 2021 - Present

Silicon Stack

- Built a Postman API testing workflow integrated with GitHub Actions.
- Executed JMeter load and stress tests to validate system performance.
- Used prompt engineering and AI-assisted workflows for QA tasks.
- Mentored 5 QA team members across Middle, Junior, and Fresher levels.

QA Intern | Mar 2021 - May 2021

Sutrix Solution

- Manual Testing - Executed test cases to ensure functionality.
- Bug Reporting - Logged and tracked bugs in Jira.

SELECTED ACHIEVEMENTS

- Received the Bug Hunter 2025 annual recognition award for defect detection and quality assurance contributions.
- Collaborated with Backend, Database, and DevOps teams on JMeter load and stress testing; the system handled 200,000+ records within 2 seconds in the reported benchmark.
- Automated scheduled API test runs, report generation, and delivery to the support team with GitHub Actions.

TECHNICAL SKILLS

Testing Skills: Functional Testing, Non-Functional Testing, API Testing, Test planning & documentation, UI Testing

Automation Tools: Postman, JMeter, OWASP ZAP, AkaAT Studio

Languages & Databases: JavaScript, SQL / SQL Server

Frameworks & Tools: Jira, GitHub Actions, Windows Task Scheduler, AI Tools - ChatGPT, Claude, Grok, n8n

KEY PROJECTS

Communication Hub - SiliconStack | 2025 - Present

Senior Quality Assurance - Internal Product - SiliconStack

An AI-driven communication platform integrating workflows across BA, Developers, Designers, and QA using n8n automation.

Technologies: n8n, AI Chatbot, Postman, Jira, ChatGPT / Claude, Chrome DevTools, Agile/Scrum

- Tested AI chatbot conversation paths, including fallback, escalation, and edge case scenarios.

CRM System - SiliconStack | Jan 2025 - Oct 2025

Senior Quality Assurance - Internal Product - SiliconStack

A web-based CRM system for the automotive industry, designed to manage post-sale customer relationships.

Technologies: OWASP ZAP, JMeter, Selenium, Docker

- Identified 12 security vulnerabilities before launch.

EDUCATION

Bachelor of Information Technology Engineering | 2017 - 2022

Ho Chi Minh City University of Industry and Trade

CERTIFICATIONS & TRAINING

Course completion: ISTQB Finance Testing (CT-FT) | Udemy - 2026

Course completion: ISTQB Test Management | Udemy - 2026

Exploratory Testing | Udemy - 2024
